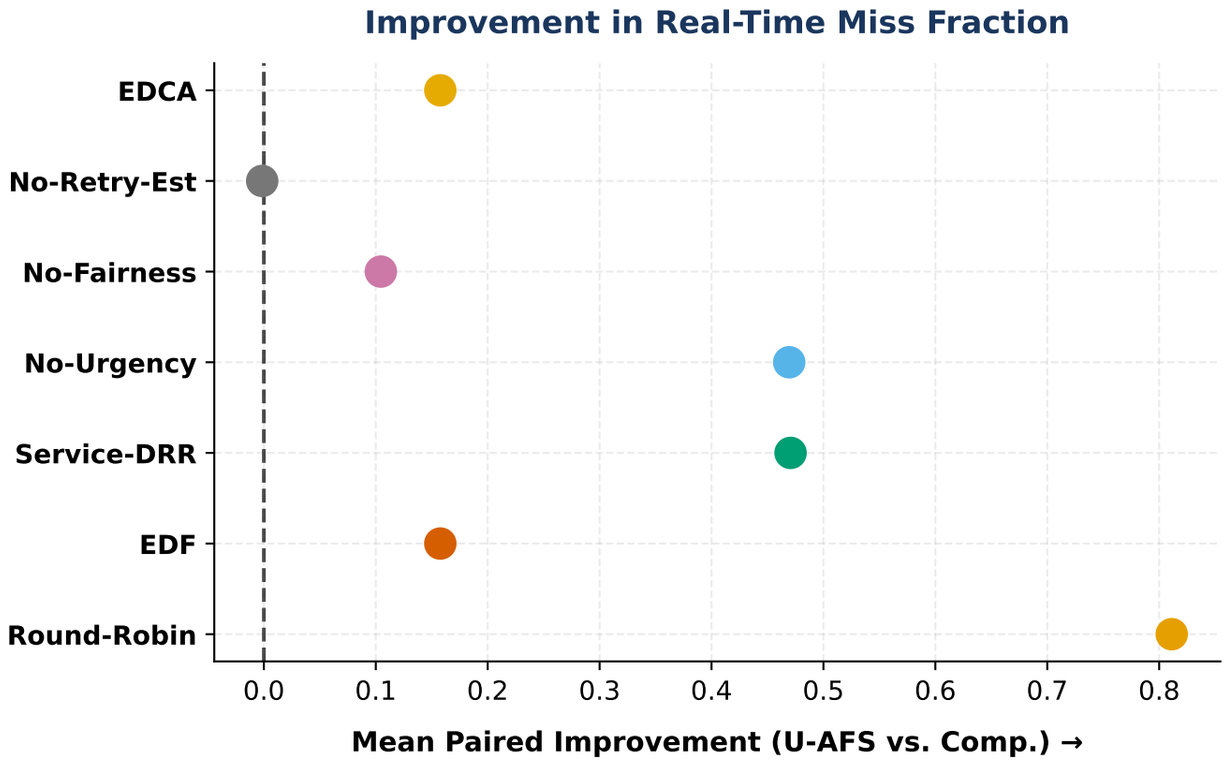
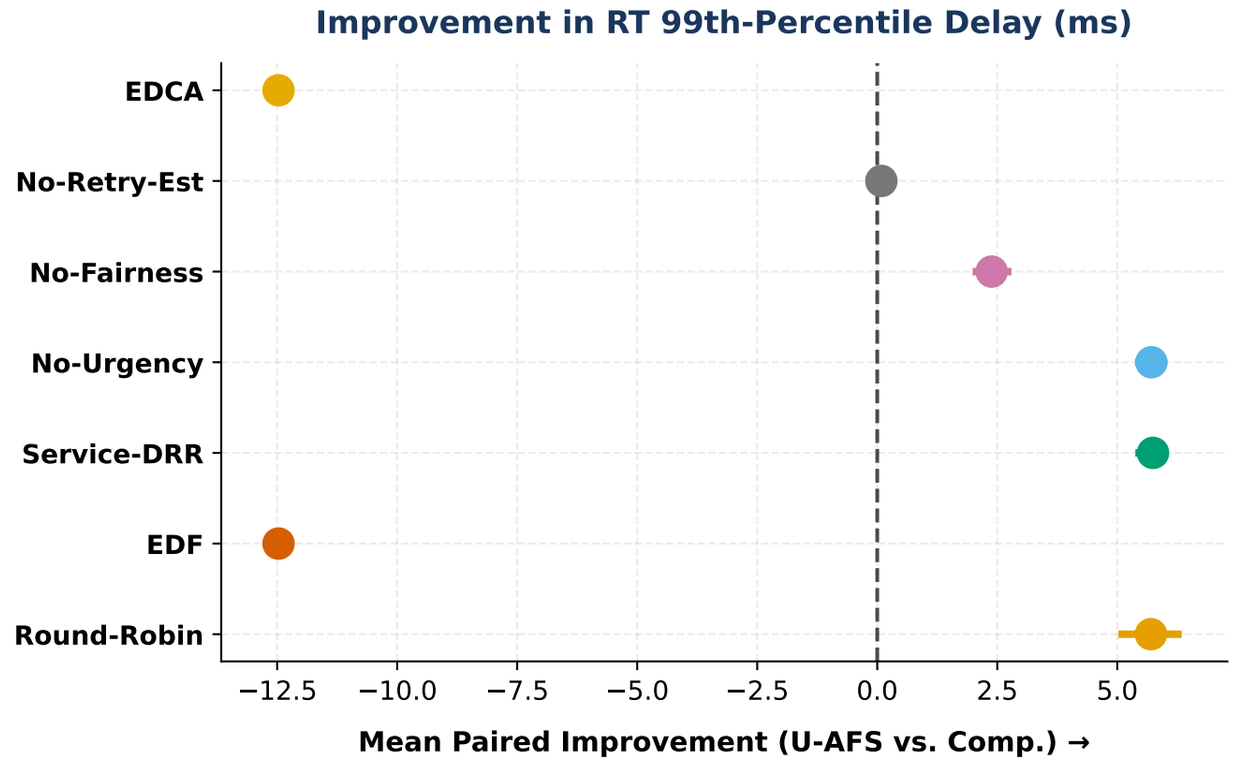
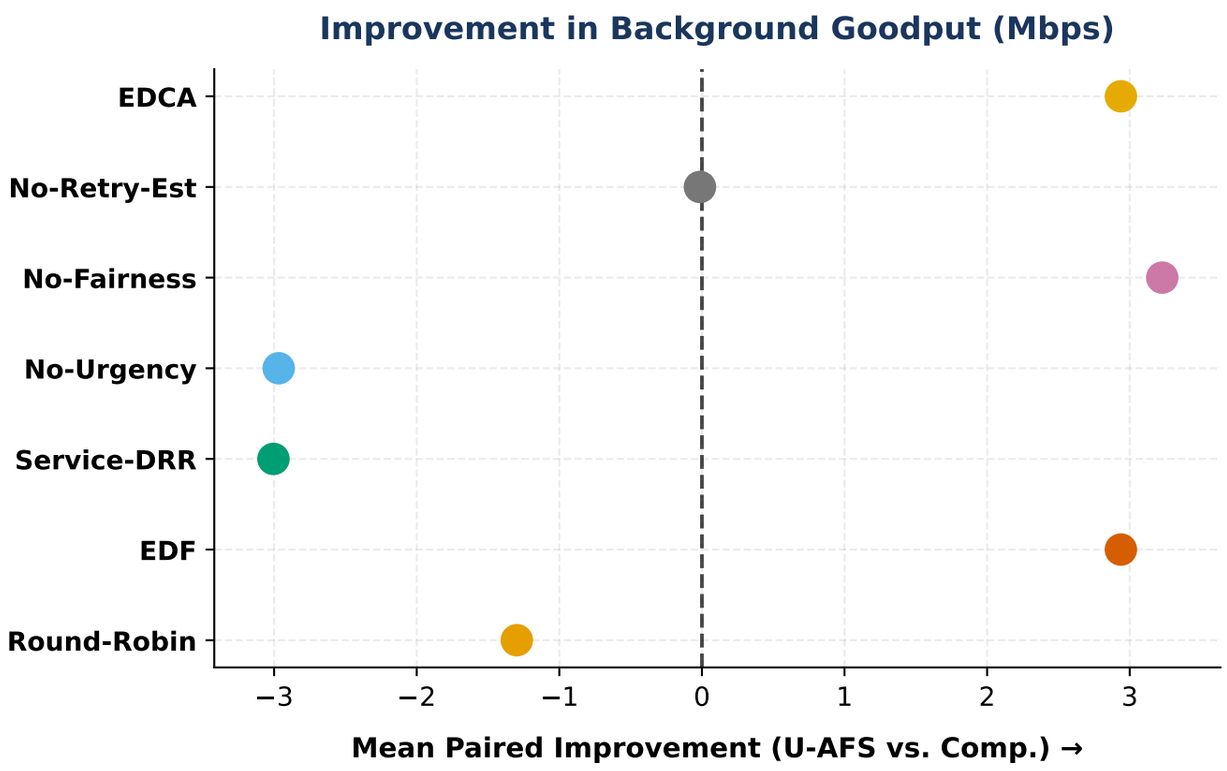
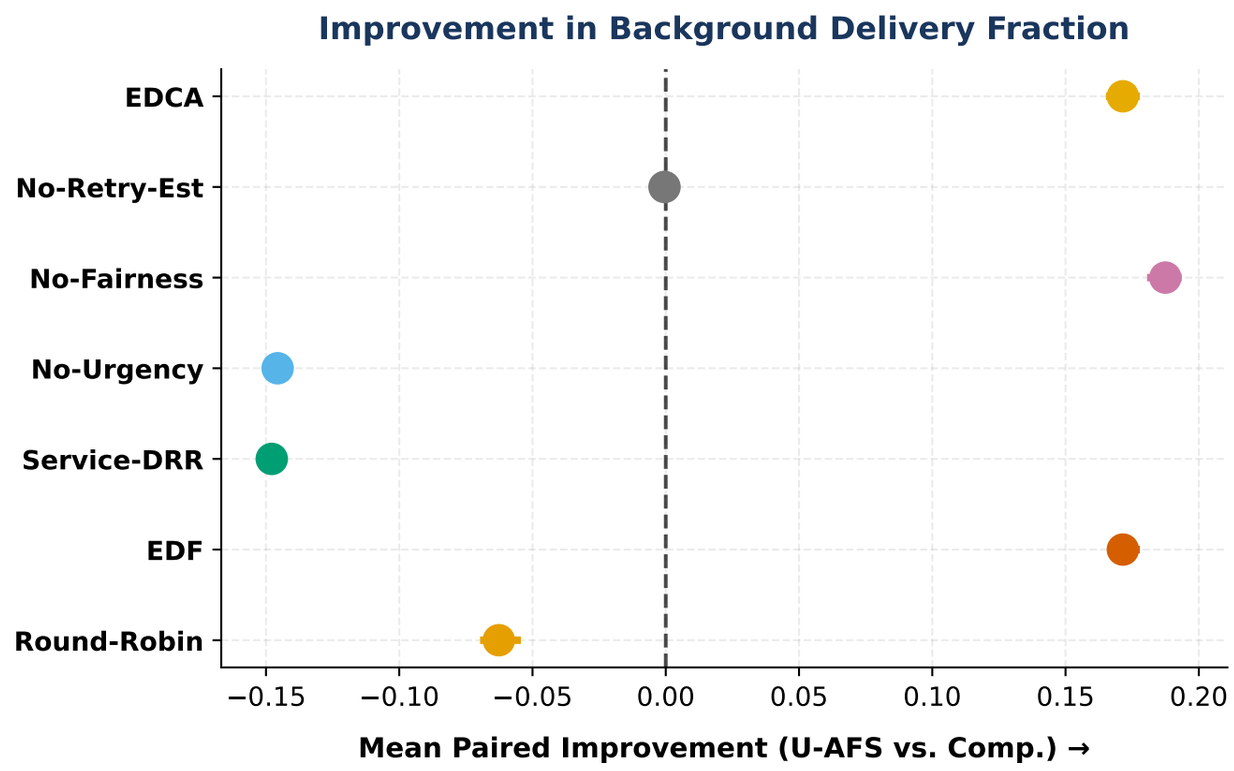
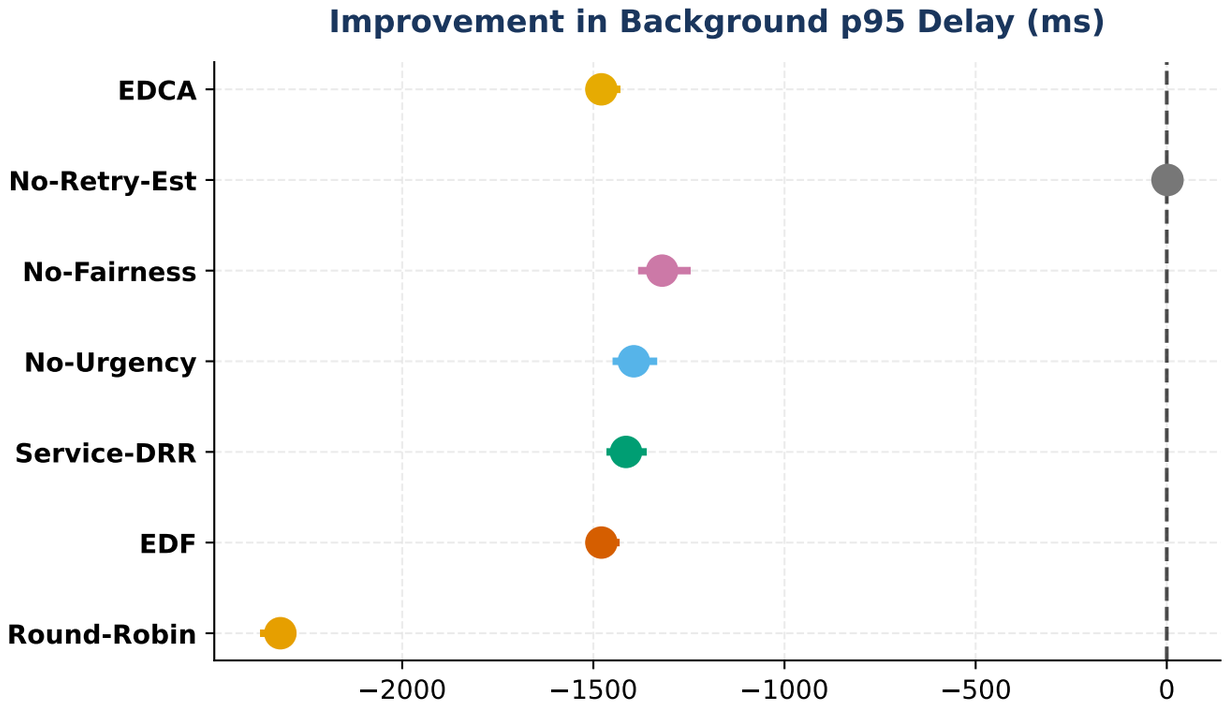
Strict-Priority (EDCA-Style) Paired Improvements
Positive improvement favors U-AFS • Stars (*): Holm-significant • Bars: 95% bootstrap CIs

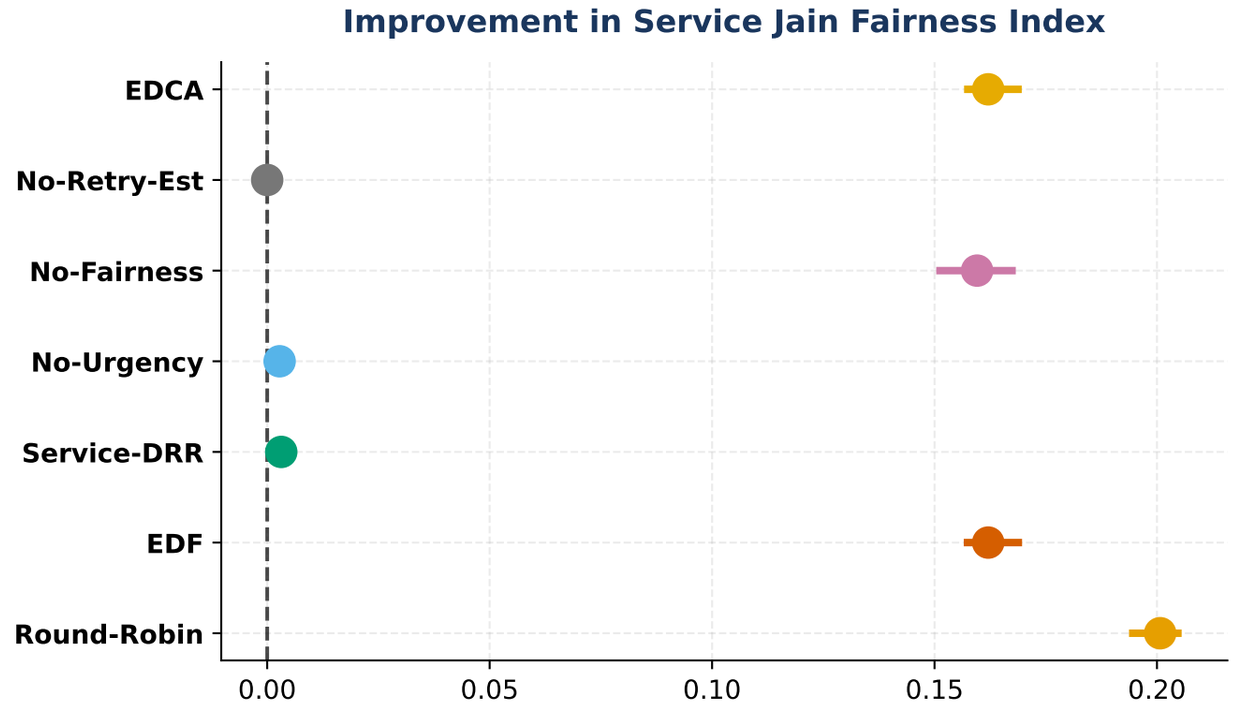


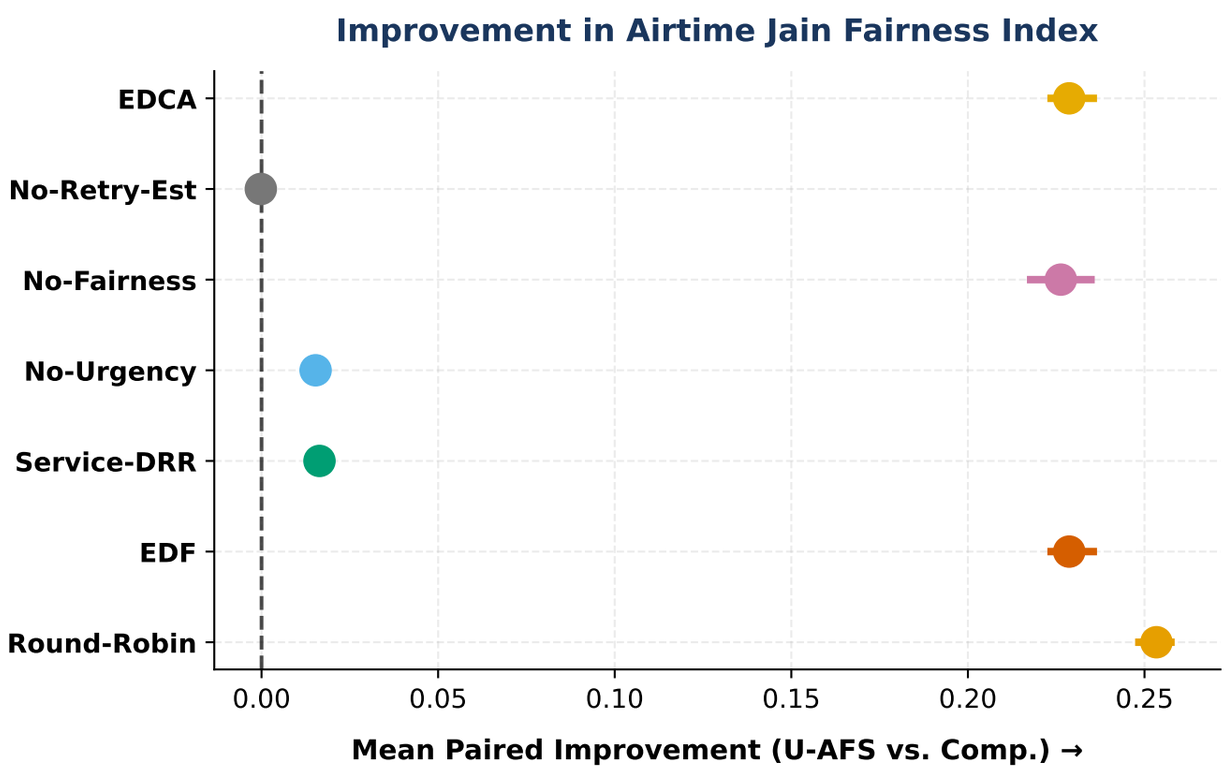












STATISTICAL METHODOLOGY GUIDE

- Positive improvement indicates U-AFS outperforms comparator.
- Star (*): Statistically significant under two-sided paired Wilcoxon signed-rank test with global Holm-Bonferroni family-wise error rate control ($p < 0.05$).
- Circle (o): Non-significant difference.
- Horizontal error bars: Unadjusted 95% paired bootstrap CIs.
